Hydrotrans builds cranes in standard sizes from 5 to 30 ton and can design and build-to-order in larger capacities.

Our smallest model Aqua-Terra is perfect for yacht and sailing clubs, dealerships, and small boatyards. They are offered with optional lift controls either mounted on the tower, operated by cable, or operated by remote control. The design features manually operated rotation.

Aqua Terra

The Aqua-Terra models from 10 tons and above are offered with the following advantages:

No swinging boats

The drive gear is powered by a frequency regulator, which means the E-motor has a soft start and stop which will keep the boat stable at all times.

Remote control

Our cranes are standard radio remote controlled. Our cranes feature standard wireless remote control. This add to safety and makes a one-man-operation possible.

Easy leveling

Each winch can be controlled independantly, wich ensures full control on the boat during lifting while she can be kept level in every direction at all times.

Options

- Working lights (underneath the main beam)
- Slings
- Jibcrane
- Special dimensions

Warranty

All Hydrotrans products are designed, manufactured and tested according to the European Conformity of Machines (CE) and are delivered with a comprehensive manual in English language. The standard warranty period is 1 year after delivery.
